PROFILE

I am an IT engineer from the University of Granada. At the moment I am specializing in DevOps, in order to master automation and custom application development.

Furthermore, I am aiming to become a dedicated and efficient full stack developer. At the same time my goal is to progress and focus my strengths on design and development with the intention of being capable to manage robust and scalable cloud architecture solutions.

Highly motivated to work in a team and face new challenges in order to consolidate my skills.

EDUCATION

Bachelor's Degree in Computer Engineering
University of Granada, Spain

2017 - 2022

The Degree in Computer Engineering has as its fundamental objective scientific, technological, and socioeconomic training and preparation for professional practice in the development and application of information technology (IT), in the field of computing.

- Specialization in IT: Ability to plan, conceive, deploy and manage IT projects, services and systems in all areas.
- Capability to lead project implementations, manage their continued improvement and assess their economic and social impact.
- I completed my studies with a grade of 9.7 on my final degree project.

One semester's exchange program
University of Seoul, Korea

6 months (2022)

Apart from being able to study subjects with extremely different methods abroad, I have also developed multicultural communication skills as well as a deep cultural awareness through interacting with people from different countries.

WORK EXPERIENCE

Maintenance of services and web pages
Internship in University of Granada

6 months (2021)

Maintenance of the website of the Students' Information Office which includes a Job Board, as well as of other platforms for internal use by the Student Participation and Information Service.

- Computer equipment and systems maintenance tasks.
- Development of applications and web pages.
